

		Impact		
		1	2	3
		Little Impact	Moderate Impact	Dreadful Impact
Likelyhood	1 Common			
	2 Uncommon			
	3 Rare			

Description	Evaluation
Tendinitis flaring up	programming speed goes down
Harddrive getting corrupted	Most recent code lost, development machine dead
Becoming ill	Unable to work on the project and we fall behind
Things being harder than expected	We might overrun
Internet going down	Development becomes slow as assistance is limited
Power going out	Most recent code lost, development machine dead
Database corruption	Data is lost
Not enough time	solution might not work

Impact	Likelyhood	Response	Colour Code
1	2	Spend more time standing up while programming	
3	3	Prepare backup machines	
2	2	Coher to responsible times and try not to overwork	
3	2	Leave plenty of time and focus on the hard stuff	
1	1	Store examples locally of how to achieve certain designs	
2	3	Post code more	
2	3	Keep backups	
3	1	Prioritise features that must work
